We are pleased to invite you to the exclusive event

Shaping the future of mobility:

*planning sustainable solutions
across European regions*

The transition towards a climate-neutral economy calls for bold action in the mobility sector: cities and regions need to redesign how people move, combining reliable public transport with shared, on-demand and emerging autonomous solutions. The ArtMED Final Conference brings together institutions, transport operators, companies and research organisations to exchange experiences, discuss lessons learned, and explore how to accelerate the deployment of sustainable, connected and safe mobility services across European regions.

The conference frames autonomous and demand-responsive mobility within broader regional strategies, connecting innovation with concrete planning choices and implementation pathways in the Euro-MED context

Simultaneous English/Italian translation will be available

24.02.2026
